

TUTORIAL SUBCOMMITTEE

Richard Holub - CHAIRPERSON

The Tutorial Subcommittee strives to offer a tutorial slate that will appeal to a cross section of PCIC attendees depending upon their experience, discipline and responsibilities. Tutorials are intended to help experienced engineers update or renew their knowledge base and to accelerate development of engineers new to the profession. The tutorial program is intended to provide all PCIC attendees with an opportunity to expand their PCIC experience, providing even more value as a result of their conference participation.

Any individual, group or company that is interested in presenting a tutorial on a technical subject is encouraged to fill out the form below and submit it to the Tutorial Subcommittee by December 1st each year:

Tutorial Proposal Form
